

FISCHER

The “making of wine” goes back as a long family tradition with the Fischers. The Fischer Wine Estate, one of the so-called original houses in Sooß, has been a family property since 1662. The vineyards face south-east on the gentle slopes of the Sooß Lindkogel, a rise in the Vienna Woods and comprising predominantly brown soil on shell limestone.

Christan Fischers passion is the production of red wines to create full-content, multifaceted wines with a harmonic tannin structure and maturing potential.

A healthy mixture of local and international varieties is the basis for producing a red wine of international quality that is typical for the climatic conditions of the region.

Together with the sale of wines in gastronomy, the trade and in selected vinotheques, the new-wine tavern run by the family is an important venue for turnover and, moreover, offers every wine lover the opportunity to taste and enjoy the wine on the spot together with good food.
